Activity 3– Practice Set React-Native

Re: Audio recording app – we will continue on the previous Digital Journal App by adding the below features.

- Login and registration.
- Protected routes (Auth)
- Profile page.

Additional Features for Audio Recording App:

- Login and Registration:
  - Implement a user authentication system with login and registration functionality.
- Protected Routes:
  - Secure certain routes in the app that require authentication to access (e.g., profile, settings).
- Profile Page:
  - Create a profile page where users can view and edit their personal information.
- User Settings (optional):
  - Allow users to customise app settings such as notification preferences, theme, etc.
- User Feedback:
  - Include a feature for users to provide feedback or report issues.
- Social Sharing:
  - Enable users to share their recorded voice notes on social media platforms.
- Cloud Integration:
  - Integrate with cloud storage services (e.g., Google Drive, Dropbox) to backup and sync voice notes across devices.
- Offline Playback:
  - Allow users to listen to their voice notes offline without an internet connection.
- User Privacy:
  - Ensure user data is protected and adhere to privacy regulations (e.g., GDPR, CCPA, POPI, etc).
